# Grup de català

**Oral learning group  
of Catalan language**

## The display of this activity

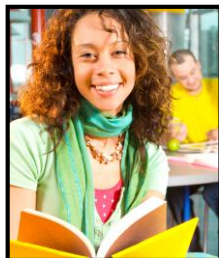

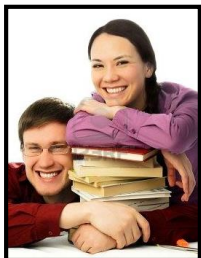

**Grup de català** by Centre d'Estudis Catalunya is a permanent team of teachers and students who organizes weekly meetings on basic or advanced training of catalan oral practice.

The work schedule of this group is mainly communication, and has the support of written practice.

The team gives linguistic support and facilitates cultural immersion to students and workers who wish to make the first moves on the spoken use of our language.

The profile of an assistant in the **Grup de català** is the one of a person who hopes for learning and practicing catalan, and for taking part in an active, implicated and motivating team of students.

## The Grup services

We provide a selection of materials that favour the use of catalan language. The materials, organized in topics, are adapted to the general programming of contents (please check [www.cedesca.com](http://www.cedesca.com)).

We propose an audio-visual anthology of easy conversations on everyday issues dedicated to people who don't know catalan language. We allow an active participation of all assistants.

Thematic areas are grouped in this way: people, places, the house and the environment, hours and days, the job, market and shopping, food, the services, health and leisure time.

**Grup de català** provides access to our school's Aula virtual to get lots of resources, audio-visual material and practical information on level certificates: [www.cedesca.com](http://www.cedesca.com).
